

LENOVO STORAGE N3310 & N4610

A highly efficient, Windows Storage Server NAS appliance with built-in enterprise storage features at a great price.

PROVEN

The LenovoStorage™ N3310 and N4610 are enterprise-class Network Attached Storage appliances built on ThinkServer innovations. Utilizing common software and hardware these devices simplify deployment, management and support. Built on the next generation of Intel technology, the N3310 and N4610 provides the performance you need to grow your business.

Experience flexibility featuring centralized storage management and unified file sharing using NAS file and iSCSI block technologies.

Need to increase your storage? The LenovoStorage N3310 and N4610 are interoperable with the ThinkServer SA120 JBOD; which expands storage capacity and can support tiering and caching.

OPTIMIZED

This Microsoft Windows Storage Server appliance delivers low cost storage to create highly available, robust, and high performance storage solutions.

This appliance saves you time because Windows Storage Server is preloaded on the system, and the interface is easy-to-use and well-known, which shortens the learning curve and gets you up and running quickly.

Microsoft Windows Storage Server provides advanced storage functionality, like storage spaces, data deduplication and compression, to any business.

RELIABLE

The combination of the robust software capabilities with Windows Storage Server and the proven innovations of ThinkServer, the N3310 and N4610 are reliable shared storage devices for data management with fast data access.

Using Lenovo AnyRAID design, you can now integrate data protection in a fault-tolerant design, which helps reduce downtime while keeping your data secure and available.

Windows Storage Server 2012 R2 supports the latest storage spaces capabilities, virtualizing your storage environment to provide continuously available file and block storage.
